Acknowledgments

This report was prepared in the Business Division under the general direction of **Harvey Kailin**, Division Chief, with direct supervision by **Louis Greenberg**, Assistant Chief, Program Development, who succeeded **Henry Wulff**. Plans and implementation procedures for the wholesale trade segment of the Census of Business were developed by **John Albright**, Chief, Wholesale Programs Branch, who was succeeded by **Caesar Hill**. **Earl Wiley**, with assistance from **Philip Thomas**, **Carl Hamilton**, and **John Trimble**, was responsible for resolving problems and reviewing the data for publication. **Robert Viehman** served as Coordinator and was the Business Division's liaison officer with other divisions. Staff assistance was provided by **Paul Shapiro**, Assistant Division Chief, Program Implementation, **Ralph S. Woodruff**, Assistant Division Chief, Research and Methodology, and **Max Shor**, Assistant Division Chief, Staff and Special Projects.

Systems and procedures were developed in the Systems Division, **Sol Dolleck**, Chief, by **Eugene Wendt**, Assistant Division Chief for Periodic Censuses, assisted by **Samuel Schweid**, Economic Census Program Manager, and **Alvin Barten**. Electronic computer programs were developed under the supervision of **William Lorenz**, assisted by **Martha Sullivan**, **Katherine Fresher**, and **Robert Janshego**.

Production controls were established under the supervision of **Francis Boucher** and **James R. Pepal**, assisted by **Caromel Wooten**. Data processing and related operations were performed by the Processing Division, **M. Douglas Fahey**, Chief, assisted by **Rudolph Micoly** and **James Shores**.

Editorial supervision was provided by **Julia Moring** of the Administrative and Publications Services Division.

Processing of wholesale reports was performed by the Jeffersonville Census Operation Division, **Joseph F. Arbena**, Chief.

Arthur Horowitz, in his capacity as the coordinator of the economic censuses, made important contributions to the planning and operational phases of the work.

Special acknowledgment is due to the many businesses whose cooperation has contributed to the publication of the data.

The statistics presented in this volume incorporate the subject preprints, series BC67-WS.

The chapters of this volume comprise the statistical portions of previously published reports (series BC67-WA and BC67-WS). Corrections made after the original publication of the reports have been carried to the cities and counties affected. Corrections have not been carried to the standard metropolitan statistical areas, States, etc., unless they significantly affect the data for such areas.

Introduction

AUTHORITY AND SCOPE—The economic censuses are required by law under Title 13, U.S. Code, sections 131, 191, and 224. The 1967 Census of Business portion of the economic censuses consisted of firms engaged in retail trade, wholesale trade, and selected services (hotels and motels; personal, business, and repair services; and amusement and recreation services including the motion picture industry) which operated in the United States. In addition, the Census of Business covered public warehouses, dental laboratories, law firms, architectural and engineering firms, travel agencies, and truck and bus carriers not subject to economic regulation by the Interstate Commerce Commission. Data for the contract construction industry also were collected in this census but published in a separate series of reports. The Census of Business also covered Guam and the Virgin Islands. A separate 1967 Census of Business, Manufactures, and Construction for Puerto Rico was conducted jointly with the Commonwealth Government.

KINDS OF BUSINESS COVERED—This report covers all establishments included in wholesale trade (limited by definition to those with one or more paid employees) in accordance with the principles of the Standard Industrial Classification (SIC) Manual, 1967.¹ Also included are

¹ Executive Office of the President, Bureau of the Budget, *Standard Industrial Classification Manual*, 1967.

wholesale liquor establishments operated by State and local governments. Establishments without paid employees, engaged in marketing merchandise at wholesale, are not included. Neither do the basic tabulations include data for administrative offices, captive warehouses, and other units which service or are auxiliary to wholesale establishments within the same organization. See the Kind-of-Business Classifications section of appendix A for definitions of the kind-of-business categories for which data are shown in this report.

CENSUS DISCLOSURE RULES—In accordance with Federal law governing census reports, any data which disclose the operations of an individual establishment or business organization are not published. However, the number of establishments in a kind of business is not considered a disclosure, so that this item may appear in instances where other items of information for the same kind of business or locality are withheld.

CORRECTIONS TO DATA—Data in this report comprise the statistical portions of previously published reports (series BC-WA). Errors found after the final publications were issued have not been carried to specific areas in this report unless they significantly affect the data for such areas. As a result the detail in some tables may not add to totals.

WHOLESALE TRADE--AREA STATISTICS

A United States summary chapter and chapters for each State, the District of Columbia, Guam, and the Virgin Islands. Statistics are presented by kind of business for counties, cities, standard metropolitan statistical areas, and for selected towns and townships in New England, New Jersey, and Pennsylvania. The kind-of-business detail varies in accordance with the number of wholesale establishments in an area. This volume consists of the area preprints, series BC67-WA.

volume five

SELECTED SERVICES--AREA STATISTICS

A United States summary chapter and chapters for each State, the District of Columbia, Guam, and the Virgin Islands. Statistics are presented by kind of business for counties, cities, standard metropolitan statistical areas, and for selected towns and townships in New England, New Jersey, and Pennsylvania. The kind-of-business detail varies in accordance with the number of service establishments in an area. This volume consists of the area preprints, series BC67-SA.

OTHER FINAL REPORTS (UNBOUND)

Reports containing 1967 Census of Business data which are not included in the bound volumes described above are--

MAJOR RETAIL CENTERS REPORTS (SERIES BC67-MRC)

A summary report and a report for each State containing one or more standard metropolitan statistical areas (SMSA's). Each report presents statistics for each SMSA in the State, the major retail centers (MRC's) in the SMSA, and the central business district (CBD) in each city with 100,000 inhabitants or more in the SMSA. Statistics for the CBD are presented for retail trade by kind of business. Data for each major retail center include (a) sales and establishment counts for total retail trade and for three major subgroups of retail trade and (b) establishment counts only by detailed kinds of business. These reports have been issued as series BC67-MRC.

RETAIL MERCHANDISE LINE SALES REPORTS (SERIES BC67-MLS)

A United States summary report and a report for each State. Each report presents statistics on (a) number of establishments and total sales for establishments in a specified kind of business, (b) the number and total sales of those establishments reporting their sales by the 25 broad merchandise lines, (c) the percentage of total sales accounted for by each of the 25 broad lines, and (d) for establishments handling a specific line, what percent of their total sales is represented by sales of that line. Additional merchandise line detail is shown for selected kinds of business. These reports have been issued as series BC67-MLS.

OTHER SUBJECT REPORTS

Warehouse Space, Warehouse Equipment, and Delivery Equipment (BC67-WS5)
Wholesale Commodity Line Sales (BC67-WS7)
Hotels, Motors Hotels, and Motels (BC67-SS2)
Laundries, Cleaning Plants, Related Services (BC67-SS3)
Motion Pictures (BC67-SS4)
Law Firms (BC67-SS5)
Architectural and Engineering Firms (BC67-SS6)
Travel Agencies (BC67-SS7)
Selected Services--Miscellaneous Subjects (BC67-SS8)
Retail Trade--Miscellaneous Subjects (BC67-RS5)

Summary of Findings

1967 CENSUS ENUMERATION

GENERAL

Sales—Sales of wholesale establishments in the United States totaled \$459 billion in 1967, an increase of 28.2 percent over the \$358 billion recorded in the previous Business Census year 1963, and 96.4 percent above the \$234 billion in 1954. The \$459 billion in 1967 was composed of \$206 billion sales by merchant wholesalers who buy and sell merchandise at wholesale on their own account; \$157 billion by sales branches and sales offices operated by manufacturers primarily for marketing products of their own plants; \$25 billion by petroleum bulk stations and terminals; \$61 billion by agents and brokers marketing merchandise at wholesale, on an agency basis; and \$10 billion by wholesale buyers and dealers in farm products, buying direct from farmers.

Sales of merchant wholesalers (firms who buy and sell merchandise on their own account and are not primarily engaged in manufacturing or producing the goods) increased from \$100 billion in 54 to \$206 billion in 1967, an increase of 105.8 percent in the 13-year period.

The relationship of the trend in wholesale trade sales to trends in other parts of the economy is illustrated by data in the accompanying summary table A. This table shows an increase of 96.4 percent from 1954 to 1967 in sales of all wholesale

establishments as a group compared with a 105.8-percent increase in sales of merchant wholesalers, an 82.5-percent increase in retail trade, and a 118.5-percent increase in the gross national product during the same period.

The increase since 1954 of 96.4 percent in wholesale trade reflects, in part, a 14.3-percent increase in wholesale prices as reported by the Bureau of Labor Statistics; but, after allowing for this change, there remains a substantial increment representing growth in the physical volume of wholesale trade. Per capita value increase also is indicated, as the increase in population from 163 million inhabitants in 1954 to 199 million in 1967 amounted to 22.1 percent.

Table A presents these and other summary facts for the Business Census years 1954, 1958, 1963, and 1967.

Establishments—At the end of 1967 there were in the United States 311,646 establishments (places of business) operated by firms with paid employees and primarily engaged in marketing merchandise at wholesale. In this number each wholesale location of organizations operating more than one place of business is counted separately. The census of wholesale trade was defined in 1954 to exclude businesses without paid employees and wholesale trade statistics in the 1954 census and subsequent years exclude such businesses.

An establishment is considered to be primarily engaged in wholesale trade when its principal business is buying and/or selling merchandise at wholesale, or acting as an agent or broker

TABLE A. Wholesale Sales and Other National Indicators: 1954 to 1967

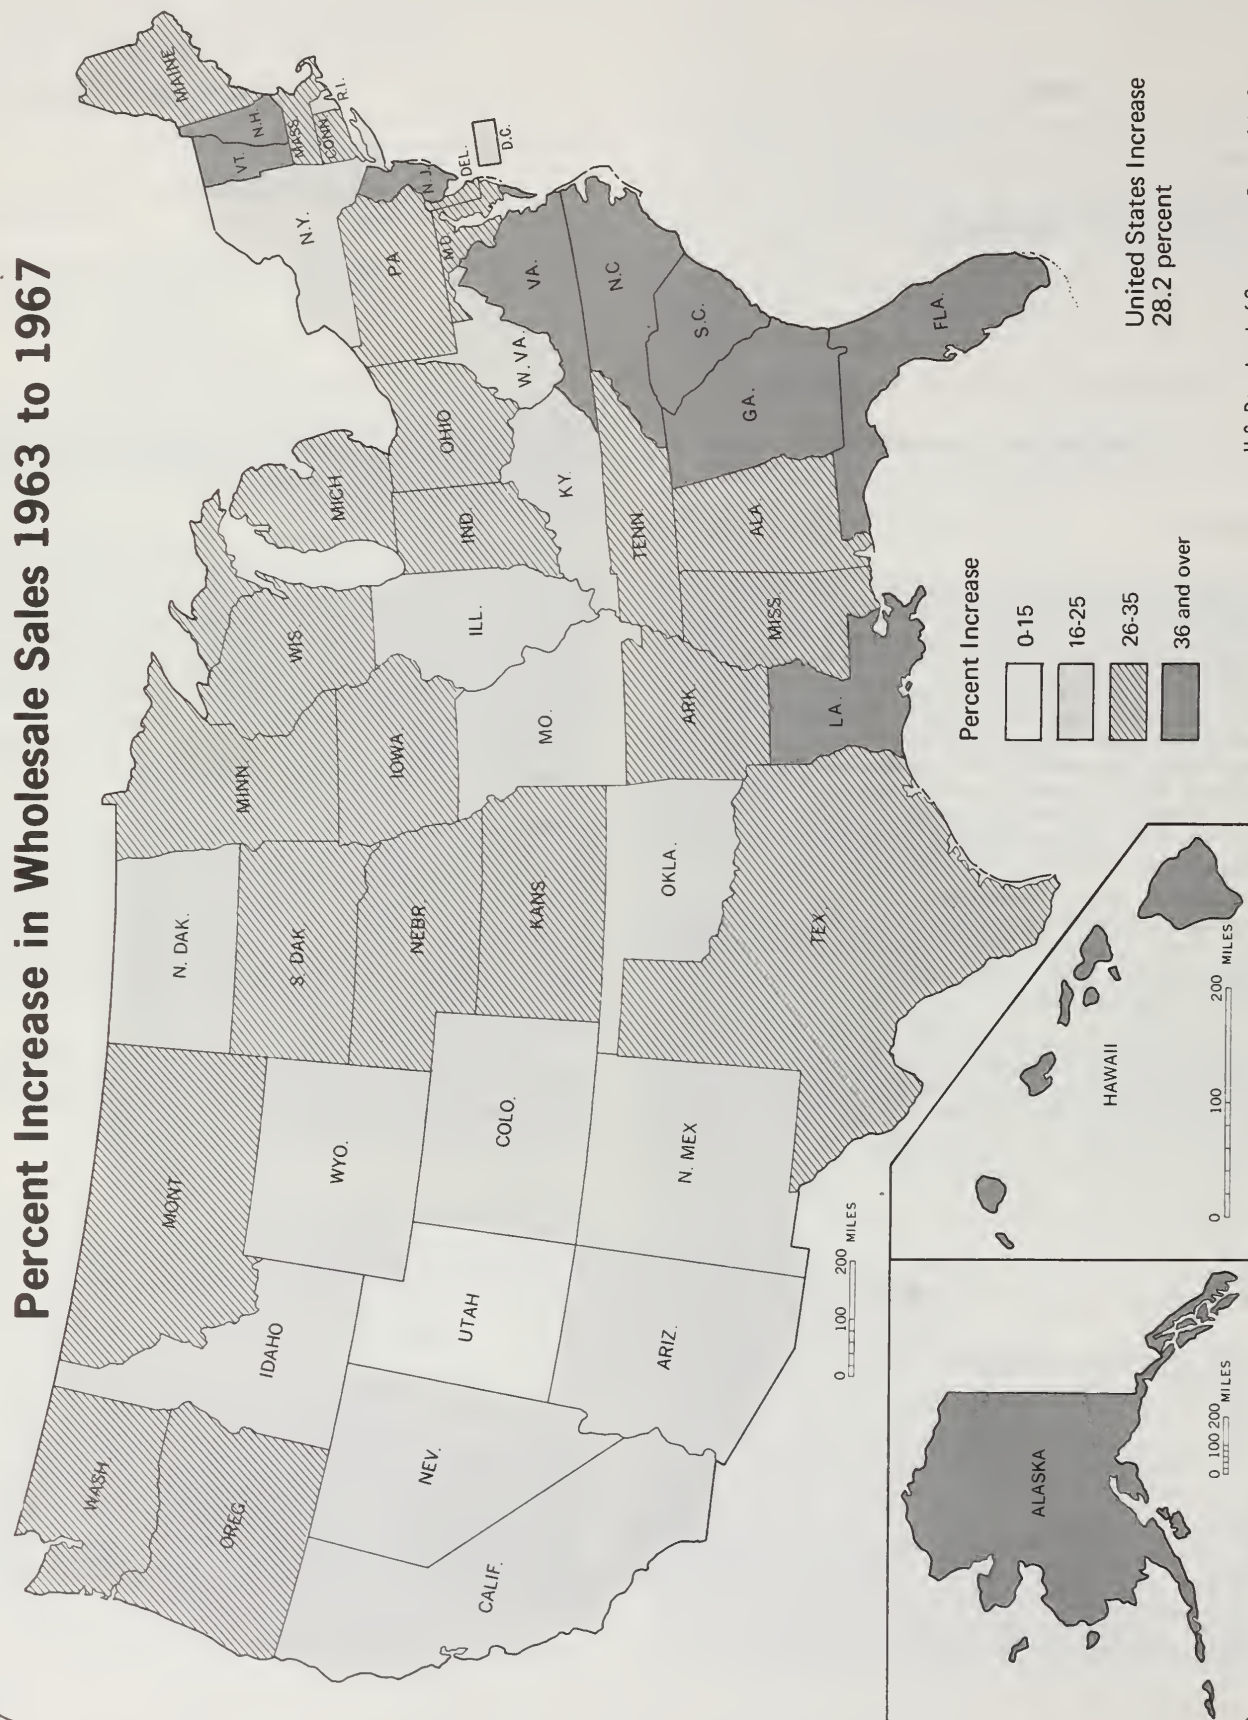

Business census year	Population (1,000)	Population index (1954=100)	Gross national product ²		Sales, wholesale establishments, all types of operation		Sales merchant wholesalers		Sales, all retail stores		Wholesale price index all commodities ³ (1954=100)

Percent Increase in Wholesale Sales 1963 to 1967

in marketing goods at wholesale. "At wholesale" includes marketing or selling merchandise to retailers; to other wholesale organizations; and to industrial, commercial, professional, institutional, and similar users. Establishments selling to customers primarily engaged in buying for business use—rather than for resale of the goods in the form purchased—are included, as well as establishments selling to resellers.

The number of wholesale trade establishments increased from 250,000 in 1954 to 287,000 in 1958, 308,000 in 1963, and to 311,000 in 1967. Data for Alaska and Hawaii are included in 1958, 1963, and 1967, but not in 1954. Alaska had 254 wholesale establishments in 1958, 291, in 1963, and 365 in 1967; Hawaii had 793 establishments in 1958, 974 in 1963, and 1030 in 1967.

Inventories—Stocks of merchandise on hand for sale at the end of 1967 were valued, at cost, at \$28 billion, up 39.5 percent from 1963. They were up 115.5 percent in 1967 over the end of 1954.

Employment and payroll—Wholesale trade establishments provided employment for 3,518,969 paid employees and 122,297 owners of unincorporated businesses as of mid-March 1967. In addition there were 162,862 employees of central offices and auxiliary units servicing wholesale establishments.

Payroll of wholesale establishments amounted to \$23.9 billion for the year 1967, up 32.2 percent from the \$18.1 billion in 1963, and 117.1 percent above 1954. Payroll in 1967 of central administrative offices servicing wholesale establishments amounted to \$1.4 billion.

TABLE B. Wholesale Trade Summary--United States: 1954 to 1967

Business census year	Establishments (number)	Sales (\$1,000)	Inventories, end of year, at cost (\$1,000)	Payroll entire year (\$1,000)	Paid employees, workweek ended nearest March 12 ¹ (number)	Active proprietors of unincorporated businesses (number)
1967.....	311,464	459,475,967	28,117,086	23,921,680	3,518,969	122,297
1963.....	308,177	358,385,749	20,149,840	18,100,929	3,088,706	138,222
1958.....	287,403	285,726,904	15,009,294	13,244,008	2,807,661	157,929
1954 ²	250,322	233,976,052	13,046,175	10,867,903	2,554,700	150,346

¹Pay period was week nearest November 15 for years prior to 1967.

²Alaska and Hawaii not included in 1954 data.

Type of operation—Wholesale trade, as defined in the Standard Industrial Classification (SIC) Manual in accordance with which censuses are conducted, includes more than is indicated in the terms "wholesaler" and "jobber." It encompasses all types of establishments primarily engaged in selling merchandise at wholesale—merchants, distributors, exporters, importers; merchandise agents and brokers; commission merchants; manufacturers' sales branches and sales offices operated apart from plants; and dealers buying products from farmers and selling at wholesale. For census purposes, wholesale trade is divided into five major type-of-operation groups as listed below, and each wholesale establishment is assigned to one of the classifications according to the characteristics of its operation, or to the nature of functions performed:

Merchant wholesalers.
Manufacturers' sales branches and sales offices.
Petroleum bulk plants and terminals.
Merchandise agents and brokers.
Assemblers of farm products.

These five groups are further subdivided into 18 detailed subtypes as described in appendix A. Summary information is presented for each of the various subtypes in table 3, United States Summary, followed by kind-of-business data for each of the subtypes.

Merchant wholesalers have consistently constituted the most important major type-of-operation group with sales varying

TABLE C. Wholesale Trade by Type of Operation--United States: 1954 to 1967

Type of operation	Number of establishments				Sales (million dollars)				Percentage change in sales		
	1967	1963	1958	1954	1967	1963	1958	1954	1963 to 1967	1958 to 1967	1954 to 1967
All types of operations, total...	311,464	308,177	287,043	250,322	459,475	358,386	285,727	233,976	28.2	60.8	96.4
Merchant wholesalers.....	212,993	208,997	190,492	163,157	206,055	157,392	122,060	100,103	30.9	68.8	105.8
Manufacturer's sales branches, sales offices.....	30,679	28,884	25,240	22,590	157,096	116,443	87,820	69,534	34.9	78.9	125.9
Petroleum bulk stations, terminals.....	30,229	30,873	30,520	29,189	24,821	21,485	20,252	16,038	15.5	22.5	54.7
Merchandise agents, brokers.....	26,462	25,313	26,666	22,131	61,347	53,245	46,589	39,250	15.2	31.7	56.3
Assemblers of farm products.....	11,101	14,110	14,125	13,255	10,155	9,820	9,005	9,051	3.4	12.8	11.3

Note: Data for Alaska and Hawaii included in 1958, 1963, and 1967, but not for 1954.

from 42.8 percent of total for all wholesale trade in 1954, to 44.8 percent in 1967. The number of establishments for this type increased from 163,157 in 1954 to 212,993 in 1967, an increase of 30.5 percent. In 1967, manufacturers' sales branches and sales offices were second among the five groups from the standpoint of sales—\$157 billion or 34.2 percent of the total—and ranked second in count of establishments. Merchandise agents and brokers ranked third in sales, \$61 billion; followed by petroleum bulk plants and terminals, \$25 billion; and assemblers of farm products, \$10 billion.

Each of the five major types of operation recorded sales gains in 1967 over 1963. Manufacturers' sales branches recorded the largest rate of increase, 34.9 percent; followed by merchant wholesalers, 30.9 percent; petroleum bulk plants and terminals, 15.5 percent; and merchandise agents, 15.2 percent. Assemblers of farm products recorded only a moderate gain of 3.4 percent.

Manufacturers' sales branches and sales offices also constituted the most rapidly growing segment over a longer period of time, with an increase of 125.9 percent in sales from 1954 to 1967, followed by merchant wholesalers, with 105.8 percent.

Kind of business—In addition to classification by type of operation, each wholesale establishment is assigned a kind-of-business classification. The method of classifying and the kinds of business for which data are shown separately are described in appendix A. Data are presented in chapter 1, table 1, United

States Summary, in the kind-of-business detail of the Standard Industrial Classification Manual. In the same table, type-of-operation information is shown in summary and for each kind of business. Considerably more kind-of-business detail for 1967 is given in table 3, and for 1963, in table 4 of chapter 1.

"Metals and minerals" (except "petroleum and scrap") ranked first with sales of \$33.7 billion in 1967. "Petroleum and petroleum products" ranked second with \$33.3 billion; followed by "Automobiles and other motor vehicles," \$31.3 billion; and "Groceries and related products n.e.c.," \$23.9 billion.

Merchant wholesalers (commonly referred to as wholesalers, distributors, jobbers, supply houses, etc.) who buy and sell merchandise at wholesale on their own account, constitute the most important of the five major types of operation with \$206.1 billion of the \$459.5 billion in sales for all types combined. Table D presents data on sales of this type of operation by kind of business for the years 1967, 1963, 1958, and 1954.

Among the major kinds of business showing a 50-percent or more increase in sales between 1963 and 1967 are: "Tires and tubes"; "Industrial machinery and equipment"; "Transportation equipment (except motor vehicles)"; and Metals service center."

Only two merchant wholesaler kinds of business recorded sales declines from 1963 to 1967—"Cotton," and "Coal wholesalers."

TABLE D. Sales of Merchant Wholesalers, by kind of Business--United States: 1954 to 1967

Kind of business	Sales (million dollars)				Percent change in sales		
	1967	1963 ¹	1958 ²	1954	1963 to 1967	1958 to 1967	1954 to 1967

¹Data for Alaska and Hawaii included in 1963 and 1967 but not in previous census years.²Data for Alaska and Hawaii included in total but not in other figures for 1958.

WHOLESALE TRADE GEOGRAPHICALLY

Wholesale trade is measured geographically for census purposes according to the location of the establishment from which the business is conducted, and to which all of the sales, employment,

payroll, etc., are credited accordingly, regardless of the size of the sales territory covered. All of the business of the wholesale establishments located in Chicago, for example, is credited to Chicago even though sales territories may extend into several States. Data for traveling salesmen are included with establishments from which they operate.

TABLE E. Wholesale Trade Sales in 1967 by States, Ranked by Sales Volume: 1954 to 1967

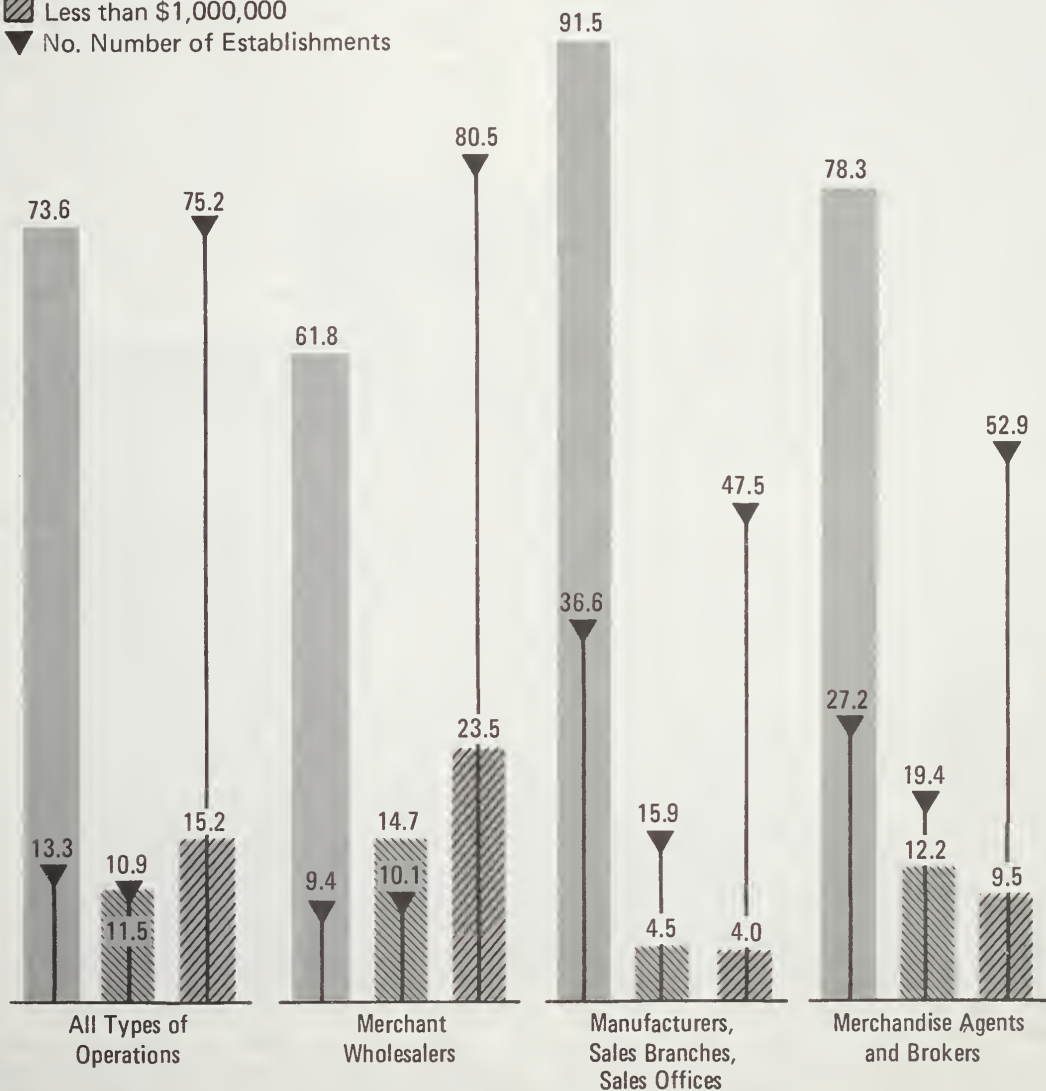

Figure 2

SALES SIZE Wholesale Trade

The Percent of Sales Volume and of Number of Establishments, UNITED STATES: 1967 by Major Sales Size Groups

Establishments With Annual Sales of:

- \$2,000,000 or more
- ▨ \$1,000,000 to \$1,999,000
- ▧ Less than \$1,000,000
- ▼ No. Number of Establishments

Measured in terms of 1967 sales for all types of operation combined, New York led all other States with \$78 billion, or 17.0 percent of the United States total. California was second with \$44 billion, or 9.6 percent of the total, followed by Illinois with 8.6 percent, Texas with 5.2 percent, and Ohio with 5.2 percent. Sales for these five States totaled \$209 billion, or 45.6 percent of the total for the country as a whole.

Among merchant wholesalers, New York, California, Illinois, and Texas also ranked one, two, three, and four, respectively, in 1967. Pennsylvania, however, ranked number five among merchants. Sales of merchant wholesalers in these five States totaled \$94 billion, or 45.6 percent of the national figure.

No changes from 1963 to 1967 are noted for all types of operation combined in the ranking of the first 10 States. In both years the States ranking from one to ten were: New York, California, Illinois, Texas, Ohio, Pennsylvania, Michigan, New Jersey, Missouri, and Massachusetts.

Standard metropolitan statistical areas (SMSA)—These areas are defined by an inter agency committee, under the direction of the Office of Management and Budget, for purposes of compiling and presenting a wide variety of data on a uniform area basis. Titles and definitions of the 230 areas in the United States, together with the two standard consolidated areas—New York, N.Y.—Northeastern New Jersey and Chicago, Ill.—Northwestern Indiana—appear in appendix D of this volume. A comparative summary for 1967 and 1963 is given in chapter 1, table 6, for each of the areas. Data are presented by kind of business for each of the areas in its respective State report.

The accompanying text table F presents a comparative summary for 1967 and 1963 of the 50 largest SMSA's as measured by wholesale trade sales volume in 1967. Approximately one-half of the wholesale establishments in the country were located in these 50 SMSA's in 1967. These establishments accounted for 72.0 percent of wholesale trade sales, slightly larger than the 71.7 percent in 1963.

The New York, N.Y., SMSA ranked first by a wide margin, having 14.6 percent of the 1967 total; the Chicago, Ill., SMSA second, with 7.1 percent; and the Los Angeles-Long Beach, Calif., SMSA third, with 4.7 percent of the national total. The New York and Los Angeles SMSA's recorded slight declines in the percent of national total in 1967 as compared with 1963, while the Chicago SMSA showed an increase.

Ranking the SMSA's by wholesale sales volumes, the positions of the first three—New York, Chicago, and Los Angeles—remained unchanged in 1967 as in 1963. Detroit moved up to position four from position five, while Philadelphia dropped from position four to position five. San Francisco, Boston, and Minneapolis retained positions six, seven, and nine respectively, while Atlanta moved from eleventh to eighth, and St. Louis dropped from eighth to tenth.

Cities and Counties—Data on wholesale trade for 1967 are presented by counties and for cities and other urban places of 5,000 inhabitants or more in table 4 of each State chapter, Volume 4, 1967 Census of Business. Table 6 of the State chapters presents information for counties with 100 wholesale establishments by kind of business. Table 7 of Chapter 1, United States Summary, presents summary information for 1967 and 1963 on establishments, sales, payroll, and employees for the 100 counties with the largest 1967 wholesale trade payroll. The accompanying text table G ranks the 50 largest wholesale counties by 1967 sales volume, together with rankings for previous business census years.

As shown in the accompanying text table G, New York County ranked first with 11.3 percent of the wholesale trade of the country; followed by Cook County, Ill., with 6.6 percent; Los Angeles County, Calif., 4.7 percent; and Wayne County, Mich., 2.1 percent. About one-fourth of the wholesale business of the United States is conducted by establishments located in these four counties.

New York County ranked first in wholesale sales, but seventh in population. Los Angeles County, Calif., however, ranked first in population but third in wholesale trade.

SIZE OF WHOLESALE ESTABLISHMENTS

Wholesale establishments for 1967 are classified by various measures of size in chapter 2: Sales size, employment size, and single-units and multiunits (firm size).

Sales size—In the 1967 census, 2,663 establishments, or 0.9 percent of the total number of all wholesale establishments, reported sales of \$20 million or more. These 2,663 establishments accounted for 30.2 percent of total wholesale trade sales. In addition, establishments in the \$10 to \$20 million annual sales bracket contributed only 1.3 percent of the number of places of business, but they accounted for 11.8 percent of sales. Thus 2.2 percent of the establishments—those with the largest sales volume—accounted for 42 percent of total sales. In contrast, 105,200 establishments reported 1967 sales of less than \$200,000 each. These smaller establishments contributed 33.8 percent of the total number but only 2.2 percent of total sales.

The 2,663 establishments with sales of \$20 million or more included 760 merchant wholesalers, 1,468 manufacturers' sales branches and sales offices, 282 merchandise agents and brokers, and 153 other types (petroleum terminals and farm products assemblers).

TABLE H. Sales Size of Establishment--United States: 1967

Sales size of establishment	Establishment		Sales	
	Number	Percent of total	Amount (mil. dol.)	Percent of total
United States, total.....	311,464	100.0	459,476	100.0
Establishments operated entire year with annual sales of--				
\$20,000,000 or more.....	2,663	0.9	138,612	30.2
\$10,000,000 to \$19,999,999....	3,993	1.3	54,126	11.8
\$5,000,000 to \$9,999,999.....	8,564	2.7	58,843	12.8
\$1,000,000 to \$4,999,999.....	59,977	19.3	125,572	27.3
\$500,000 to \$999,999.....	49,611	15.9	35,189	7.7
\$200,000 to \$499,999.....	73,643	23.6	23,944	5.2
Less than \$200,000.....	105,200	33.8	10,170	2.2
Establishments not operated entire year.....	7,873	2.5	13,020	2.8

Merchant wholesalers, all kinds of business combined, classified by sales-size groups, show upward movement when comparing data for 1967, 1963, and 1958. Establishments in the \$5 million-and-over sales bracket reported 31.0 percent of total sales for this type group in 1958, 33.9 percent in 1963, and 39.9 percent in 1967. At the other extreme, establishments in the less-than \$200,000 annual sales bracket accounted for 6.3 percent in 1958, 5.2 percent in 1963, and 3.8 percent in 1967.

Figure 3

SALES SIZE, Wholesale Trade

Merchant Wholesalers

Sales Volume by Employment Size of Establishment

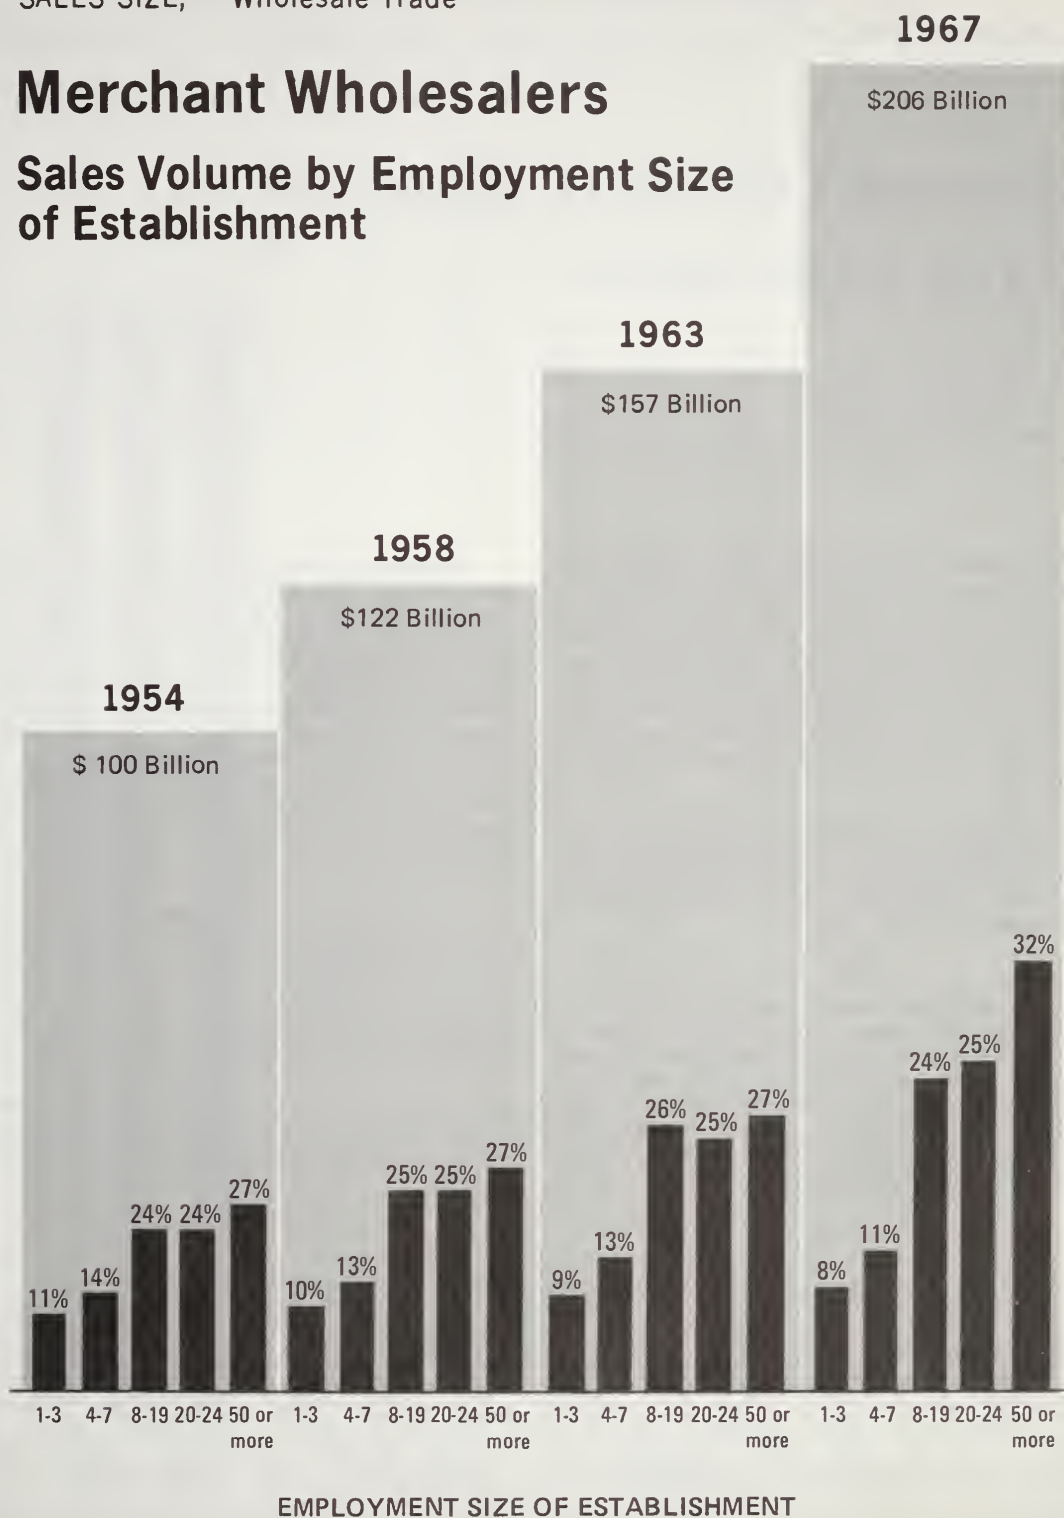

TABLE I. Merchant Wholesaler by Sales Size--United States: 1967, 1963, and 1958

Sales size of establishment	Sales as percent of total			Operating expenses as percent of sales			Payroll as percent of sales		
	1967	1963	1958	1967	1963	1958	1967	1963	1958

Less than \$100,000.....	1.2	1.7	2.2	24.7	25.1	28.9	13.1	13.1	12.0
Establishment not operated entire year.....	3.4	2.5	1.4	13.1	15.8	15.0	6.8	7.6	6.6

Operating expenses (including payroll), expressed as a percentage of sales, bears an inverse relationship to sales size, as establishments in the larger annual sales volume brackets recorded smaller expense ratios. This trend is consistent from smaller to larger sales brackets for each of the three census years covered in the accompanying text table I. Operating expenses in general showed a small increase for the census years—1958, 1963, and 1967. However, the larger establishments appear to be increasing their operating expenses at a more rapid rate than the smaller establishments.

Payroll, expressed as a percentage of sales, shows the same general trend as operating expenses of which it is the major part. Payroll ratios have increased, generally, for the three census years 1958, 1963, and 1967, although larger sales-size brackets recorded smaller payroll-to-sales ratios.

Employment size—Wholesale establishments are tabulated by employment-size classes in chapter 2, tables 6, 7, and 8, based on the number of paid employees for the work week including March 12. A high concentration of establishments is noted in the smaller employment-size brackets with 63,000 places of business having either no paid employees or one paid employee and 69,000 with two or three employees. Thus, 132,000 (42 percent of the total) had fewer than four employees.

Measured in terms of number of paid employees per establishment, little change is noted in the period from 1954 through 1967. The average number of employees for all types of establishments combined dropped from 10.2 per place of business in 1954 to 9.8 in 1958, then rose slightly to 10.0 in 1963, and remained at 10.0 in 1967. Measured in terms of percentage of total sales, establishments with no or one paid employee contributed 3.3 percent of sales in 1967, compared with 3.6 percent in 1963. Those with two or three employees accounted for 6.6 percent in 1967 compared to 8.5 percent in 1954. In 1963, the establishments having 50 or more employees accounted for 29.1 percent of total sales compared with 31.5 percent in 1967. The sales per establishment of this group climbed from \$12 million in 1963 to \$13.7 million in 1967.

A somewhat similar trend is noted among merchant wholesalers where the average number of paid employees per establishment, for all kinds of business combined, declined from 10.1 in 1954 to 9.7 in 1958, rose slightly to 9.9 in 1963, and remained at 9.9 in 1967. Average annual sales per employee, however, recorded consistent increases—from \$61,000 in 1954 to \$66,000 in 1958, \$76,000 in 1963, and \$85,000 in 1967.

Firm size—Firms or companies engaged in wholesale trade are classified in tables 11 and 12 of chapter 2 according to the total number of wholesale establishments operated by them at the end of 1967.

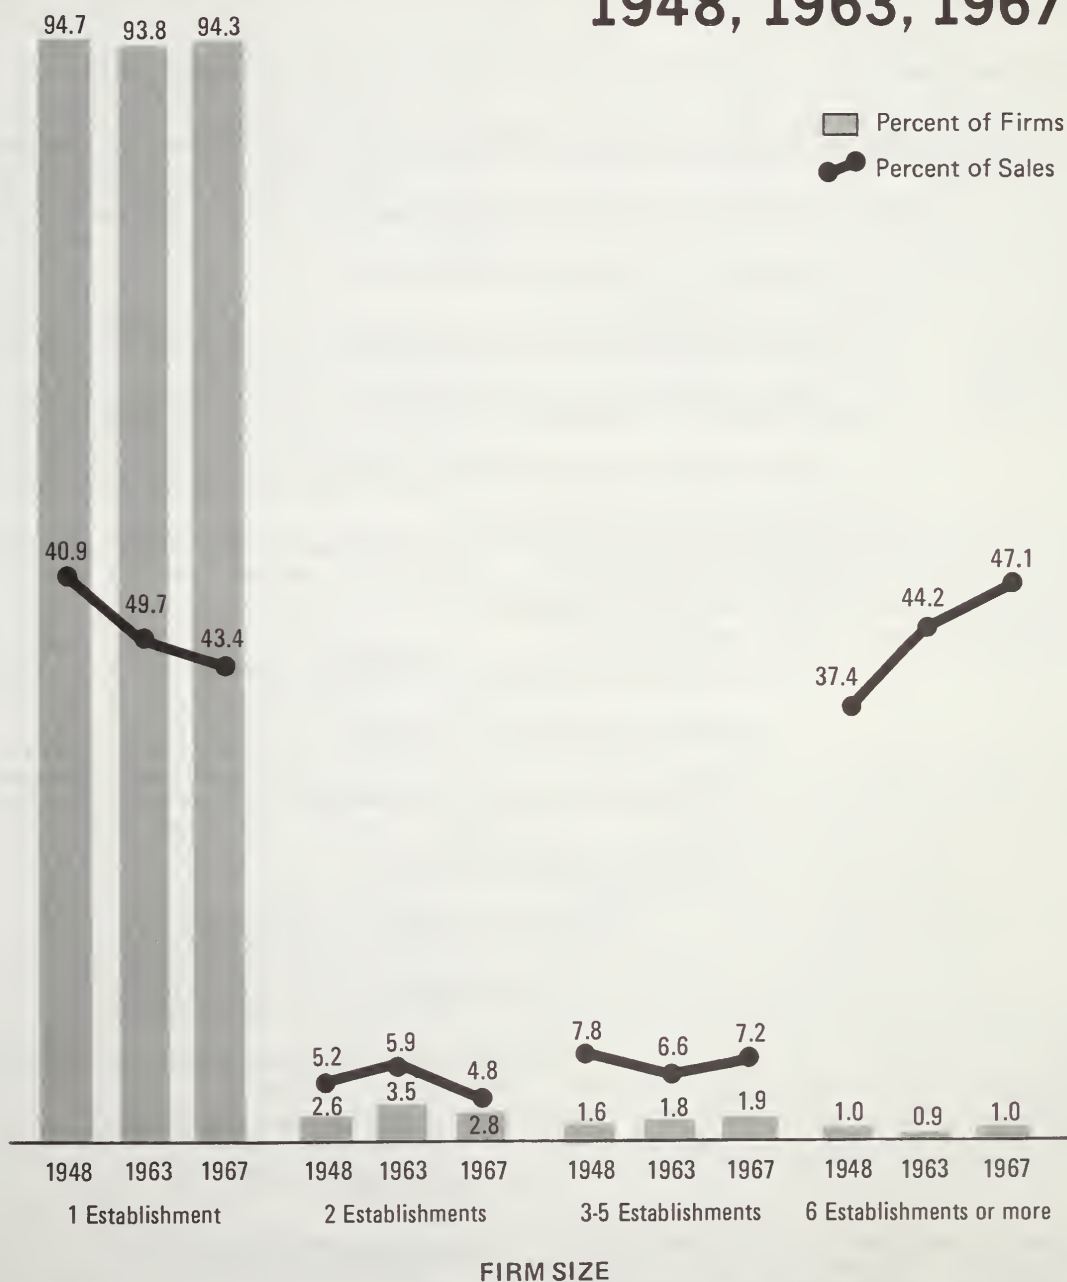

TABLE J. Employment Size of Establishments--United States 1954 to 1967

Employee size (mid-numbers)	Establishments, 1967 (number)	Sales as percent of total				Payroll as percent of total			
		1967	1963	1958	1954	1967	1963	1958	1954

¹Includes establishments with no paid employees.

SALES SIZE, EMPLOYMENT SIZE, SINGLE UNITS AND MULTIUNITS Wholesale Trade

Wholesale Trade by Firm Size: 1948, 1963, 1967

The 311,464 wholesale establishments were operated by 232,783 different firms, of which 219,561 firms or 94.3 percent operated only one wholesale place of business. These single-wholesale-establishment firms operated 70.3 percent of the places of business but contributed only 40.9 percent of 1967 sales of all wholesale establishments. Each of 6,608 firms, or 2.8 percent of the total number, operated two wholesale establishments. They accounted for 4.8 percent of sales. At the other extreme, 393 firms, or 0.2 percent of the total number, each operated 26 establishments or more; but these 0.2 percent accounted for over one-third (35.0 percent) of all wholesale trade sales.

one-half—59.6 percent—of the sales of manufacturers' sales branches and sales offices.

The pattern among assemblers of farm products is similar to that of merchant wholesalers and of merchandise agents and brokers, with firms operating only one or two establishments predominating in sales, accounting for 81.1 percent, while firms with 26 or more establishments contributed only 1.4 percent of the total. Petroleum bulk plants and terminals, on the other hand, are more like manufacturers' sales branches and sales offices, in that firms operating 26 or more establishments accounted for 68.9 percent of the total.

TABLE K. Wholesale Trade by Firm Size--United States: 1967

Firm size	Firms (number)	Establishments		Sales	
		Number	Per- cent of total	Amount (\$1,000')	Per- cent of total
United States, total.	232,783	311,464	100.0	459,475,967	100.0
1 establishment.....	219,561	219,057	70.3	187,841,341	40.9
2 establishments.....	6,608	13,216	4.2	22,041,624	4.8
3 to 5 establishments....	4,531	16,172	5.2	32,878,421	7.2
6 to 10 establishments...	1,114	8,255	2.7	24,656,846	5.4
11 to 25 establishments..	576	9,271	3.0	30,785,281	6.7
26 to 50 establishments..	210	7,200	2.3	34,206,751	7.4
51 establishments or more	183	38,293	12.3	127,284,760	27.6

Table L presents a summary of sales of single units and multiunits by type of operation where it is noted that firms operating only one establishment accounted for 60.6 percent of the total business of merchant wholesalers and 78.4 percent for merchandise agents and brokers. Among manufacturers' sales branches and sales offices, however, they accounted for only 2.1 percent of total sales.

TABLE L. Percent of Total Sales by Type of Operation and Firm Size: 1967

Firm size	Percent of total sales				
	Mer- chant whole- salers	Manufac- rurers' sales branches, sales offices	Merchan- dise agents and brokers	Petro- leum bulk sta- tions and termi- nals	Assem- blers of farm products
United States, total.	100.0	100.0	100.0	100.0	100.0
1 establishment.....	60.6	2.1	78.4	24.0	81.1
2 establishments.....	7.6	1.4	4.1		
3 to 5 establishments....	10.3	3.8	6.7	3.0	5.6
6 to 10 establishments...	6.2	4.5	6.3	4.1	11.9
11 to 25 establishments..	4.6	12.0	2.5		
26 to 50 establishments..	3.2	16.6	1.1	68.9	1.4
51 establishments or more	7.5	59.6	.9		

At the other extreme, firms with 51 wholesale establishments or more at the end of 1967 accounted for only 7.5 percent of the sales of merchant wholesalers and only 0.9 percent for merchandise agents and brokers; but they contributed over

RECEIVABLES AND BAD-DEBT LOSSES

Merchant wholesalers provided data on their end-of-year receivables (accounts and notes receivable from the sale of merchandise and on company books at the end of the year) and bad-debt losses (receivables written off during the year as uncollectable). Results of this inquiry are presented in chapter 3, table 1, for the country as a whole and in table 2 for standard metropolitan statistical areas.

Of the 212,993 merchant wholesale establishments in business at the end of 1967, 144,399 reported end-of-year receivables; 25,606 reported that they sold on a cash basis only (hence they had no receivables); and 42,988 did not report on this inquiry. Sales in 1967 of those reporting end-of-year receivables amounted to \$161 billion; the establishments which reported all sales on a cash basis had \$13 billion in sales; those not reporting cash-credit information reported sales of \$31 billion.

The accompanying text table M shows the trends in receivables and in bad debt losses, as a percent of sales, from 1954 to 1967.

Receivables rose from 8.4 percent of sales in 1954 to 9.6 percent in 1958, and declined slightly to 9.5 percent in 1963, and to 9.4 percent in 1967.

Receivables as a percent of sales varied by kind of business with "Musical instruments-sheet music" wholesalers reporting a high of 18.8 percent of annual sales. Other trades recording receivables equal to 16.0 percent or more of annual sales included—

- Dental supply houses.
- Religious, school supply houses.
- Surgical, medical, hospital supply houses.
- Camera, photographic supplies distributors.
- Jewelry, diamonds, precious stones.
- Phonograph records, prerecorded tapes.

At the other extreme, nine kinds of business each recorded a ratio of less than 5 percent—

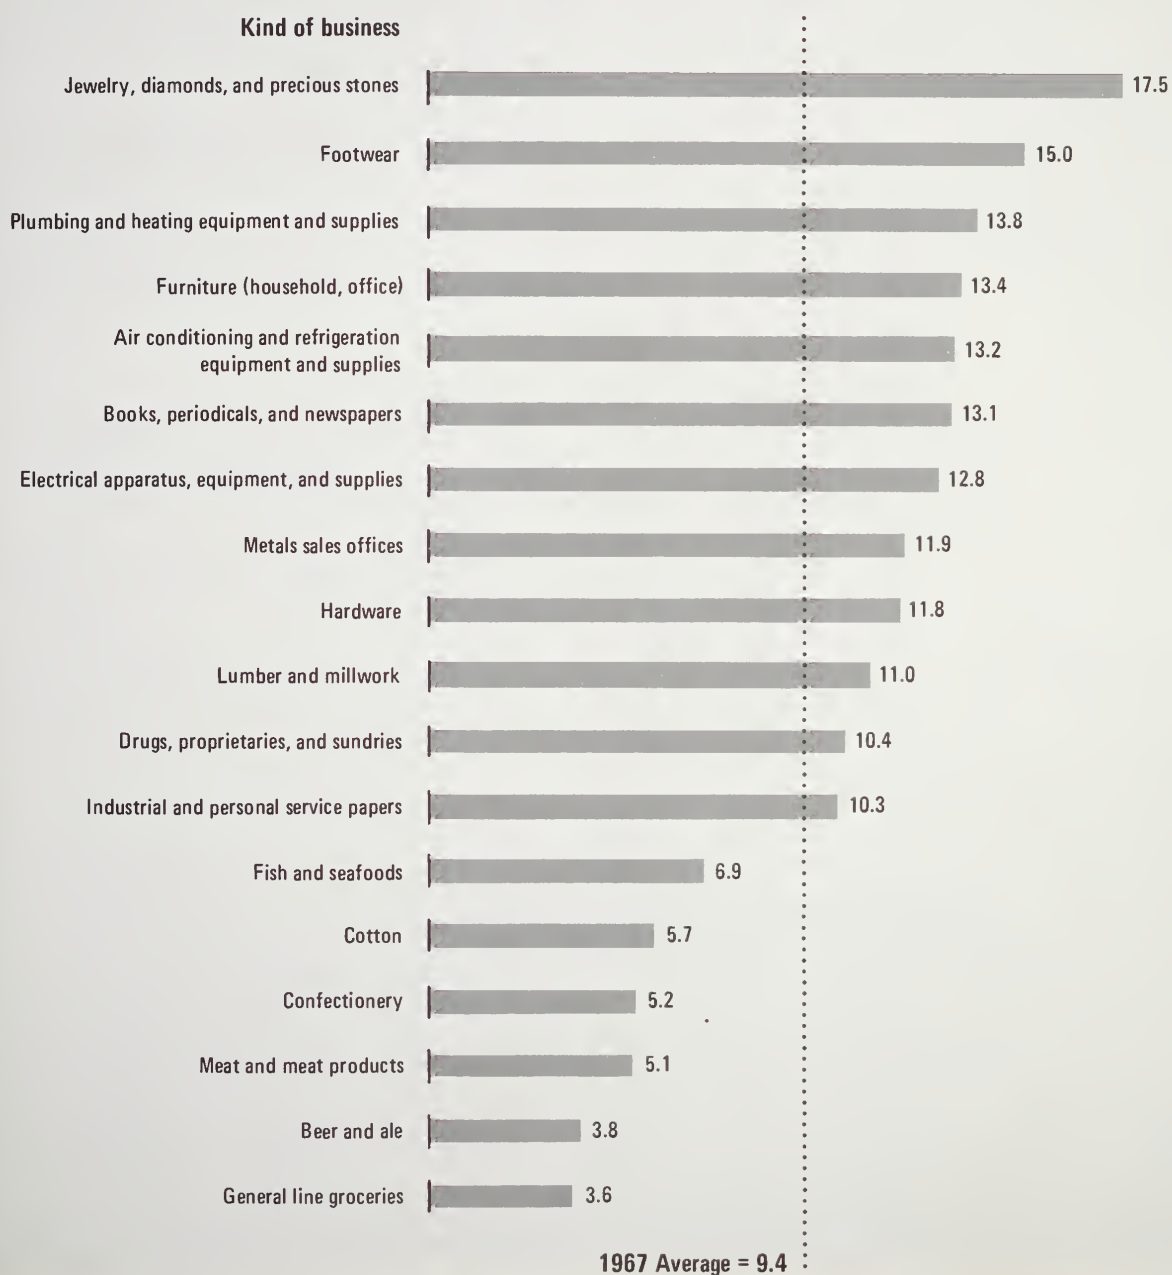

- New, used automobiles, motorcycles.
- Volunteer group groceries.
- Retailer-cooperative groceries.
- Cotton.
- Grain.
- Livestock, except horses and mules.
- Tobacco, tobacco products.
- Beer.
- Food, beverage basic materials.

Figure 5

CREDIT SALES, RECEIVABLES, AND BAD-DEBT LOSSES — Wholesale Trade

MERCHANT WHOLESALERS

End-of-Year Receivables as a Percent of Sales,
for Selected Kinds of Business: 1967

Bad-debt losses, at the rate of 17 cents per \$100 of merchant wholesalers sales were estimated at \$350 million for 1967 compared with \$287 million in 1963. Kinds of business recording losses of more than 40 cents per \$100 sales included—

Transportation equipment, except motor vehicles.
Aircraft equipment, aeronautical equipment, parts.
Oil wells, oil refinery, pipeline equipment.
Used automotive parts and equipment.

TABLE M. Merchant Wholesalers, End-of-year Receivables--
United States: 1954 to 1967

Year	All establishments		Establishments re- porting end-of-year receivables		
	Number	Sales (mil. dol.)	Sales (mil. dol.)	Receiv- ables as per- cent of sales	Bad-debt losses as per- cent of sales
Merchant wholesalers:					
1967.....	212,993	206,055	161,344	9.4	0.17
1963.....	208,997	157,392	126,647	9.5	0.19
1958 ¹	189,728	121,661	88,353	9.6	0.15
1954.....	163,157	100,103	74,147	8.4	0.14

¹Data for Alaska and Hawaii are not included in the 1958 and 1954 figures.

SALES BY CLASS OF CUSTOMER

Sales of wholesale establishments in 1967 are analyzed by classes of customer in chapter 4 of this volume to show separately sales to industrial, commercial, etc., users (customers who normally buy for business use rather than for resale in the form purchased); sales to the Federal Government; sales to consumers and farmers (retail sales); sales to retailers of all types; sales to wholesale organizations; and export sales. For some kinds of business, sales to repair shops; to public utilities; to restaurants, institutions, and other food service establishments; and to contractors and builders are also shown separately. Data for merchant wholesalers, merchandise agents and brokers, and for assemblers of farm products are presented in table 1 of chapter 4. Data for merchant wholesalers are presented in tables 2, 3, and 4.

Table N and the accompanying chart summarize the 1967 results for merchant wholesalers and show some significant historical trends.

Retailers still constituted the most important customers of merchant wholesalers in 1967, accounting for about two-fifths of their sales (39.4 percent). Industrial, commercial, etc., users constituted the second most important class of customer, accounting for 37.0 percent of the total; followed by sales to other wholesale organizations, 14.5 percent; export sales, 5.9 percent; sales to the Federal Government, 1.5 percent; and sales to consumers and farmers, 1.6 percent. Historically, the portion

SALES BY CLASS OF CUSTOMER

Wholesale Trade

Merchant Wholesalers 1958, 1963, and 1967

Percentage Distribution of Sales by Class of Customer

1967 CENSUS OF BUSINESS, U.S. Department of Commerce, Bureau of the Census

of sales to retailers has been declining—from 45.9 percent in 1958 to 39.4 percent in 1967. Sales to industrial, commercial, and Federal Government accounts, on the other hand, represent a growing portion of the business—from 31.7 percent in 1958 to 38.5 percent in 1967. Sales to other wholesale organizations have decreased from 15.3 percent of the total in 1958 to 14.5 percent in 1967. Export sales have remained fairly constant, at about 6 percent.

The increase in sales to industrial and institutional accounts is illustrated by the kinds of business shown in table N. For example, meat wholesalers' sales to institutional-industrial users rose from 23.9 percent in 1954 to 36.0 percent in 1967; sales to retailers declined from 53.9 percent to 40.3 percent during the same period, while sales from one meat wholesaler to another increased from 19.1 to 21.8 percent.

"Electrical supplies and apparatus" distributors show an interesting trend, historically, with sales to retailers declining from 38.9 to 15.8 percent of the total, while industrial-commercial, etc., accounts rose from 53.5 to 78.0 percent. The 78.0 percent in 1967 was distributed as follows: 39.4 percent to contractors and builders, 2.9 percent to government, 9.8 percent to public utilities, and 25.9 percent to other industrial concerns.

"Merchandise agents and brokers" and "Assemblers of farm products" show an increasing portion of their sales to retailers, accompanied by a decline in their sales to wholesaler organizations.

PETROLEUM BULK STATIONS AND TERMINALS

The total number of petroleum bulk stations and terminals (excluding LP gas stations) increased slightly from 1954 to 1967,

with a net increase during the interval of 720 establishments (from 28,319 to 29,039). A decided change, however, is noted in the type of station—a decrease of 740 in the number of bulk stations, but an increase of 1,470 in terminals (the larger facilities) from 1,241 in 1954 to 2,701 in 1967. This increase has been consistent, from 1,241 in 1954 to 1,632 in 1958, to 1,965 in 1963, to 2,701 in the most recent census.

NA Ranking not available. D Withheld to avoid disclosure.

¹Data was not included for Alaska and Hawaii prior to 1967.

In text table P, States are listed according to petroleum storage capacity as of the end of 1967, with comparative rankings for previous census years. Total capacity is shown for 1967, as is State ranking: New York ranked first, followed by New Jersey, Massachusetts, Illinois, and Pennsylvania. These five States accounted for 36.9 percent of the national total.

MISCELLANEOUS SUBJECTS

Chapter 7 of this volume presents tables on a number of subjects, such as beginning- and end-of-year inventories, legal form of organization, and central administrative offices and auxiliaries servicing wholesale establishments. A list of the subjects covered appears in the table of contents to the chapter, page 7-1. Some of the subjects are reviewed briefly in the following paragraphs.

Legal form of organization—Data are shown for wholesale trade by kind of business. Corporations predominate in wholesale trade; all types of operation combined accounting for 85.7 percent of total sales in 1967. Moreover, they recorded a sales increase of 31.9 percent from 1963 to 1967, compared with an overall increase of only 28.2 percent. Individual proprietorships were second to corporations in 1967, both in count of establishments (81,798) and sales (6.1 percent of the total). Establishments operated by partnerships numbered 20,095 with 3.8 percent of total sales. Both proprietorships and partnerships recorded decreases in establishment counts and percentage of total sales in 1967 compared with 1963. Cooperative associations (corporate and noncorporate), although relatively small in number of establishments (7,207) and sales (3.7 percent of the total in 1967), recorded an increase of 18.5 percent in sales from 1963 to 1967.

The pattern is somewhat similar among merchant wholesalers with corporations accounting for 83.3 percent of sales in 1967 and showing a 35.3 percent increase over 1963. Individual proprietorships and partnerships both recorded decreases in establishment counts, but the former recorded a sales increase of 28.8 percent, compared with a decline of 15.7 percent for partnerships. Cooperative associations accounted for only 3.9 percent of sales among merchant wholesalers in 1967, but they showed a 26.5 percent increase over 1963.

Administrative offices and auxiliary units—Many multiunit firms (firms with two or more establishments) maintain administrative offices or auxiliary units which are apart from any

wholesale establishment but engaged in servicing such establishments. Included in this category are such locations as central administrative offices, district offices, central warehouses, company garages, company research and development, etc. Such establishments may do some selling, but their primary function is to service company establishments that are primarily engaged in selling merchandise. Data for these types of establishments are presented in tables 10 and 11 of chapter 7, but they are not included in any other tables.

There were 3,811 central offices and auxiliaries (for description see appendix A) primarily engaged in servicing company-operated wholesale establishments in 1967. These 3,811 establishments reported 162,862 employees as of mid-March and payroll for the year totaled about \$1.4 billion. Sales were recorded as \$6.3 billion and inventories of merchandise on hand for sale at the end of the year were valued (at cost) at \$1.3 billion.

PUBLIC WAREHOUSING

Revenue of the Nation's 9,433 public warehousing facilities during the year 1967 amounted to \$1,625 million, an increase of \$506 million or 45 percent over 1963. In 1963, last previous year of the census, 8,838 such establishments reported revenue of \$1,119 million

Payrolls amounted to \$634 million in 1967, up 40 percent over payrolls for 1963. There were 115,194 paid employees in public warehousing at mid-March 1967. In addition, there were 4,378 proprietors of unincorporated businesses with paid employees.

Public warehouse floor space was reported at 393 million square feet in 1967, a gain of 38 million square feet or 11 percent over the 355 million square feet reported in 1963. Refrigerated space available for public use amounted to 534 million cubic feet, up 60 million cubic feet or 13 percent over the 474 million cubic feet available in 1963. Bulk liquid space assigned to public storage was reported at 520 million gallons, up 53 million gallons or 11 percent over the 467 million gallons reported for the previous period.

The primary activity of facilities in this group was the warehousing and storage of goods for others. Unincorporated businesses which operated without paid employees are not included in these figures.

SAMPLE SURVEYS

INTRODUCTION

An additional study was conducted covering merchant wholesalers in connection with the 1967 Census of Business based upon probability sample reporting rather than upon universe coverage. The results of this survey were published in a separate

report entitled: *Value Produced, Capital Expenditures, Fixed Assets, and Rental Payments, by Merchant Wholesalers*. We have previously published information for value produced and capital expenditures, but this is the first time data on rental payments and fixed assets have been compiled for merchant wholesalers.

A description of the survey methodology, scope, sample design, estimating procedures, and special definitions used is included in the text material which follows.

VALUE PRODUCED

Several measures have been developed to analyze the "output" of the distribution trades and to provide a comparison of the distribution sector of the economy with other sectors, such as manufacturing, agriculture, and mining. The several measures of value produced in or by merchant wholesaling firms measure to differing degrees the value added to merchandise between the time and place of purchase by wholesalers and the time and place they sell it.

Merchant wholesalers sell goods to retailers and other wholesalers for resale, and to industrial, commercial, institutional, and professional users. In addition to selling, merchant wholesalers perform a variety of functions, including maintaining inventories of goods; extending credit; physically assembling, sorting, and grading goods in large lots; breaking bulk and redistributing goods in smaller lots; delivery; refrigeration; and various types of promotion, such as advertising and label designing. The measures presented in this report provide approximations of the dollar value of the functions performed in the marketing process, whether performed by merchant wholesaler firms or by other firms for merchant wholesalers.

"Gross margin" as used in this report includes the value of all materials (as distinguished from goods to be resold) and services provided by other firms to merchant wholesalers, as well as those strictly creditable to the merchant wholesaling firms. Excluding "materials" provided by other firms results in "value added." Excluding, in addition, "services" provided by other firms results in "net income produced (at market prices)." A further exclusion of certain tax items and of depreciation leads to the measure of "net income produced (at factor cost)" by merchant wholesaling firms.

These measures are defined in greater detail in the section on "Explanation of Terms." Data are presented in this report in detail by kind of business (tables 1, 2, 3, 4, 5 and 6), by size of firms (tables 5 and 6) and by legal form of organization (tables 7 and 8). Measures of the reliability of the data are also included.

Summary of Data—Total operating receipts of merchant wholesalers during 1967 amounted to \$204.8 billion. After deducting the cost of goods sold, merchant wholesalers indicated a gross margin of \$38.5 billion, or 18.8 percent of total operating receipts. Further deducting the cost of containers, supplies, and other materials; fuel and electric energy purchased from other firms; and the cost of contract work done on materials owned by them; merchant wholesalers showed a "value added" of \$36.7 billion, or 17.9 percent of total operating receipts. After costs of all materials and services supplied by other businesses were deducted from total operating receipts, merchant wholesalers showed a "net income produced (at market prices)" of \$27.2 billion, or 13.3 percent of total operating receipts. After further deducting depreciation, license fees, and taxes (except income taxes), "net income produced (at factor cost)" amounted to \$23.6 billion, or 11.5 percent of total operating receipts. The annual payroll of merchant wholesalers amounted to \$15.7 billion, or 7.7 percent of total operating receipts.

Total operating receipts of merchant wholesalers increased 31 percent from 1963 to 1967 while gross margin was up 35 percent and net income produced was up 36 percent. Annual payrolls for the same period were up 30 percent.

Value produced ratios for the durable goods trades were generally higher than those for the nondurable goods trades. Durable goods trades, in total, reported a gross margin of 22.8 percent of total operating receipts in 1967 as compared to a gross

margin of 15.6 percent shown for the nondurable goods trades. "Net income produced (at market price)" amounted to 16.1 percent of total operating receipts in the durable goods trades as compared to 11.1 percent for the nondurable goods trades. "Net income produced (at factor cost)" amounted to 14.9 percent of total operating receipts in the durable goods trades as compared to 8.9 percent in the nondurable goods trades.

Ratios varied considerably for individual kinds of business. Gross margins ranged from a high of 32.1 percent to a low of 4.5 percent of total operating receipts; "value added" varied from 30.6 to 4.3 percent; "net income produced (at market prices)" varied from 22.5 percent to 3.0 percent; "net income produced (at factor cost)" ranged from 20.9 to 2.7 percent; while annual payrolls varied from 15.8 to 1.1 percent. Grain merchants reported the lowest ratios for all measures. Stationery, office supplies; professional equipment, supplies; service-establishment supplies; commercial machines, equipment; paints and varnishes; and automotive equipment, tires, tubes were among the trades reporting the highest ratios.

Ratios varied by size of firm, with the larger firms showing smaller ratios of these measures to total operating receipts. Firms with operating receipts of \$20 million and more indicated a gross margin of 13.6 percent in 1967, compared to a gross margin of 31.5 percent reported by firms with operating receipts of less than \$100,000. Net income produced (at factor cost) amounted to 7.7 percent of total operating receipts for firms in the \$20 million class but 19.0 percent for firms with operating receipts of less than \$100,000.

Limited function wholesalers, such as drop shippers (who perform no storage function), would be expected to have a smaller ratio than full service wholesalers. A special study in two trades—furniture and lumber—indicated that firms without inventories reported a significantly lower ratio than those which maintained inventories. Below are results of this study:

Measures of value produced	Percent of total operating receipts			
	Furniture wholesalers		Lumber wholesalers	
	With inventories	Without inventories	With inventories	Without inventories
Gross margin.....	29.1	22.0	20.2	7.4
Value added.....	28.0	21.2	19.1	6.0
Net income produced (at market prices).....	20.3	14.7	14.0	5.1
Net income produced (at factor cost).....	18.9	13.3	12.8	4.9
Annual payroll.....	14.9	8.9	9.4	2.9

Corporations, which accounted for over 80 percent of total operating receipts, showed ratios differing only slightly from the summary trade totals. Individual proprietorships indicated the largest ratios, reflecting the smaller firm size characteristic of this group. Partnerships showed somewhat lower ratios than individual proprietorships, while cooperatives indicated the lowest ratios by legal form of organization.

CAPITAL EXPENDITURES

Capital expenditures of merchant wholesalers include all costs actually incurred during 1967 which were chargeable to the

fixed assets accounts of the firm and which were of the type for which depreciation accounts are normally maintained.

Included were all expenditures (whether on contract or by employees of the firm) for new or used structures, fixtures, and equipment, including those under construction at the end of 1967; and expenditures for additions, major alterations, capitalized repairs, and improvements to existing facilities. Expenditures made by the firm for structures which, on completion, had been or were to be sold or leased back by the firm were also included.

Excluded from these figures were expenditures for land, and cost of maintenance, repairs, supplies, or other costs chargeable as current operating expenses. Also excluded were expenditures made by owners of property rented or leased by the merchant wholesalers. Thus, expenditures at trade establishments by real estate firms are excluded.

Data on total capital expenditures and on new capital expenditures for 1967 and 1963 are shown by kind of business in table 9, and by legal form of organization in table 10. Capital expenditures of wholesale establishments operated by corporations are shown by kind of business in table 12.

Summary of Data—Total capital expenditures of merchant wholesalers amounted to \$1.6 billion in 1967, an increase of 39 percent over the \$1.1 billion reported in 1963. Expenditures of \$1.4 billion for new facilities in 1967 (including new structures and new equipment) accounted for 91 percent of this total, with the largest amount, \$1.0 billion (70 percent), directed toward new equipment, and the remainder, \$429 million (30 percent), expended for new structures.

Capital expenditures in the durable goods trades totaled \$853 million in 1967, an increase of 56 percent over 1963. Nondurable goods wholesalers, with total capital expenditures of \$72.2 million in 1967, showed a smaller increase (23 percent) over 1963.

Capital outlays for new facilities by durable goods wholesalers amounted to \$774 million in 1967, an increase of 60 percent over 1963. These expenditures included \$535 million for new fixtures and equipment and \$239 million for new structures and additions. Capital expenditures for new facilities by nondurable goods wholesalers totaled \$666 million in 1967 (a 35 percent gain over 1963), of which \$476 million was for new equipment and \$191 million was for new structures and additions.

Kinds of business reporting substantial capital expenditures in 1967 included machinery, equipment, supplies—\$292 million; groceries and related products—\$135 million; and metals, minerals (except petroleum and scrap)—\$111 million.

Corporations reported total capital outlays of \$1.3 billion in 1967, an increase of 43 percent over the \$888 million reported in 1963. Expenditures of \$1.2 billion for new facilities accounted for 92 percent of this total, with \$666 million in the durable goods trades and \$509 million in the nondurable goods trades.

FIXED ASSETS AND RENTAL PAYMENTS

Gross (book) value of fixed assets, as of the beginning of 1967, represents the acquisition cost (original cost or other basis) of all fixed assets for which depreciation and amortization accounts are ordinarily maintained. This includes all costs incurred in making the assets usable (such as transportation and installation).

Net value represents the gross value of such fixed assets, less their accumulated depreciation and amortization. In addition to the net value of assets at the beginning and end of the year, respondents were requested to report capital expenditures during 1967, other acquisitions of assets (by merger, exchange of stock, etc.), depreciation and amortization charges against fixed assets during 1967, and other deductions from fixed assets (i.e., assets sold, retired, scrapped or destroyed). These figures were used in verifying the reported net value of assets at the end of the year.

Included as fixed assets are all buildings, structures, equipment, and other depreciable assets of domestic merchant wholesale establishments, including their auxiliary facilities—warehouses, garages, etc. Machinery, equipment, structures owned by wholesalers but leased or rented to other companies are also included. Improvements and new construction in progress but not yet completed are also included in the value of fixed assets.

Excluded are nondepreciable capital assets such as inventories, cash, accounts receivable, etc., land and other depletable assets, such as timber, and mineral rights.

Rental payments include payments made for the use of all items for which depreciation reserves would be maintained if they were owned by the establishment; e.g., structures, buildings, machinery, and equipment. Separately identified fees for leasing of land (such as ground rents) are excluded.

Data on the gross and net value of fixed assets, total capital expenditures, rental payments, and operating receipts during 1967 are shown by kind of business for all merchant wholesale establishments in Table 11, and for wholesale establishments operated by corporations in Table 12. Similar data by legal forms of organization for the summary trade groups are included in Table 13.

Summary of Data—The gross (book) value of fixed assets of merchant wholesalers amounted to \$11.7 billion at the beginning of 1967. Capital expenditures during 1967 added \$1.6 billion to these fixed assets accounts. After deducting depreciation and amortization charges and excluding assets sold, retired, scrapped and destroyed during the year, the net (depreciated) value of fixed assets at the end of 1967 amounted to \$6.9 billion, an increase of \$402 million (6 percent) over the \$6.5 billion net value of fixed assets at the beginning of the year. Rental payments by merchant wholesalers amounted to \$1.35 billion, of which \$1.0 billion (77 percent) was for buildings and other structures, and \$309 million (23 percent) was for machinery and equipment.

Among the kinds of business reporting substantial fixed assets (net value) at the end of 1967 were groceries and related products—\$1.1 billion; machinery, equipment supplies—\$1.1 billion; motor vehicles, automotive equipment—\$582 million; metals, metalwork—\$548 million; farm products (raw materials)—\$432 million; lumber construction materials—\$374 million; and scrap, waste materials—\$357 million.

The ratio of fixed assets (net value) to total 1967 operating receipts was 3.4 percent for all merchant wholesalers. The durable goods trades showed a fixed assets-to-operating receipts ratio of 4.1 percent compared to a ratio of 2.8 percent for the nondurable goods trades. By kind of business, this ratio varied from 8.1 percent for scrap, waste materials and 4.7 percent for metals, metalwork to 1.1 percent for dry goods, apparel and 1.5 percent for tobacco.

EXPLANATION OF TERMS

Total Operating Receipts—This item includes total sales of merchandise on own account, after deducting all returns, allowances, and discounts, but including sales and excise taxes collected from customers; commissions received for the sales of goods; and any other receipts from customary business activity.

Total operating receipts, as shown in this report, differ from total sales, as shown in the 1967 Census of Business, because commission sales—or sales on the account of others—are included in total operating receipts only at the amount of commission earned—whereas they are included in total sales at the value of the goods sold. The difference between total operating receipts and total sales in 1967 was about 0.7 percent. For individual kinds of business it differed at most by 2 percent; for most kinds of business, by less than 1 percent.

Cost of Goods Sold—This item is not shown separately in this report but may be obtained by subtracting gross margin from total operating receipts. Regarding the comparability of cost of goods sold with the Internal Revenue Service Statistics of Income data, see page

Cost of goods sold was compiled for each firm in this survey by adding to the opening inventory all purchases of merchandise during the year and commissions paid to others for purchases on own account; and then deducting the end-of-year inventory from the total. Purchases are net of returns, allowances, and trade and cash discounts, but include payments for freight, insurance, import duties, and other charges for purchases. Reporting firms were instructed to exclude, where possible, purchases of containers and wrapping, packaging, and selling supplies which were to be reported under "operating expenses."

Purchases of tax stamps and payments of excise taxes often included by tobacco and liquor wholesalers in their purchase accounts were, for purposes of this survey, excluded from cost of goods sold and included as a separate item under "operating expenses" used to derive net income produced (at factor cost).

Gross Margin—This item represents total operating receipts less cost of goods sold (purchases adjusted for change in inventories). Gross margin is equivalent to the cost of all materials (as distinguished from goods to be resold) and services provided in merchant wholesale establishments whether provided by the merchant wholesaling firm itself or purchased by it from others. To the extent that it includes cost of contract work done by others on materials of the merchant wholesale firm, gross margin includes an element of value added by manufacturing.

"Value Added"—This item represents the gross margin (as defined above) less the cost of containers, other supplies and materials, fuel, and electric energy and water purchased from other firms, and less contract work on materials of the wholesaler. "Value added" in merchant wholesale firms includes the value of services purchased from other firms, and therefore falls between "gross margin" and "income produced."

Net Income Produced (at Market Prices)—This item represents the "value added" (as defined above) less cost of services supplied by other businesses (except interest payments) and less bad debts and other losses not compensated by insurance.

Net Income Produced (at Factor Cost)—This item represents net income produced (as defined above) less depreciation, sales taxes, excise taxes, license fees, and taxes other than income taxes. Net

income produced (at factor cost) thus includes payroll, employer contributions to FICA, unemployment insurance, etc., interest payments, and profits before income taxes.

Annual Payroll—Payroll includes all salaries, wages, commissions, bonuses, and allowances for vacation and sick leave paid to employees in 1967 before payroll deductions; for corporations, it includes amounts paid to officers and executives; it does not include payments to or withdrawals by owners or partners of unincorporated businesses. (Employer contributions for unemployment insurance, pension, welfare, and other insurance plans are not included in this figure but were reported separately in the survey.)

SCOPE OF THE SURVEY

The information in this section is limited to merchant wholesalers, who constitute the major portion of the broad field of wholesale trade, and excludes the other types of wholesale trade, such as manufacturers' sales branches and sales offices, petroleum bulk stations, agents and brokers, and assemblers of farm products. In terms of total payroll, merchant wholesalers accounted for more than 60 percent of the payroll for total wholesale trade. All kinds of business in which merchant wholesalers operate are represented. A description of each kind of business for which data are shown in this report is included in appendix B.

Sample Design—The sample is a probability sample representing merchant wholesalers in all kinds of business and was selected from two sources:

- (a) 1963 Census of Business lists representing all wholesalers (with paid employees) in business in 1963 and
- (b) Social Security Administration lists of wholesalers (with paid employees) entering business (or requesting new EI numbers) since 1963.

A systematic random sample was drawn from the 1963 Census of Business lists, which had been sorted by sales size and by kind of business, at rates varying according to the sampling variability and the sales volume of each sales-size group. The sample was supplemented from the lists of wholesale births obtained from SSA which were sampled in a two-stage sampling procedure. A first-stage sample was selected on the basis of broad trade groups and employee-size classes. On the basis of additional information by kind of business and sales size obtained from the first-stage sample, the firms were arranged by kind of business and sales-size groups approximating those used for the census sample and then a second-stage sample was selected for additions to the sample initially drawn from the 1963 census.

A more detailed description of the sample design is included in the Census Bureau's *Monthly Wholesale Trade Report*. The number of firms in the sample used for the *Monthly Wholesale Trade Report* varies for each kind of business from 50 to 650 firms, depending upon the total number of firms in the trade and their distribution by sale size. However, the number of firms canvassed for this report to provide measures of value produced in and by merchant wholesaling firms averaged about 200 firms per kind of business—ranging from 34 to 372 firms by kind of business.

ESTIMATES AND RATIOS

Total operating receipts (as shown in this report) were derived from figures collected in the 1967 Census of Business. These

figures were also compiled in connection with the sample survey. The ratios to total operating receipts shown in the report were obtained from the sample survey; the dollar volume estimates were derived by multiplying the ratios for each kind of business obtained from the sample survey by the total operating receipts for each kind of business obtained from the 1967 census. The sampling variability of the dollar volume estimates, therefore, is the same as the sampling variability of the ratios.

Respondents in the sample survey were requested to report on a consolidated basis for all wholesale establishments and their auxiliary facilities—warehouses, garages, etc.—operated under the Federal Employer Identification number selected in the sample. Although the “operating expense” figures for wholesale establishments in the 1967 census did include a pro rata share of the general offices expenses, the “payroll” figures in the 1967 census did not include payrolls for their administrative and auxiliary establishments. However, in the sample survey, the payroll figures did reflect the payrolls of the administrative and auxiliary units. The payroll figures shown in this report for all merchant wholesalers is therefore about 2 percent higher than payroll figures reported for merchant wholesaler establishments in the 1967 census.

Differences between the 1967 census payroll figures and the sample survey figures are also attributable to—

- (a) Sampling errors of the sample survey estimates, and
- (b) Changes in kind-of-business classification between the 1963 and 1967 census years.

LIMITATIONS OF THE DATA

Sampling Variability—The selected measures of value produced, capital expenditures, rental payments, and fixed assets are based on a sample and are therefore subject to sampling variability. They are not expected to be in exact agreement with the results that would have been obtained from a complete enumeration.

Sampling errors were computed for each of the measures shown in this report. For all trades combined, the sampling variability of the estimates was about 1 percent for the measures of value produced; 3 percent for total capital expenditures; 2 percent for rental payments; and 1 percent for fixed assets. The sampling errors are shown at the one-sigma level. That is to say, the chances are about two out of three that the published estimates would differ by less than the percentages shown from the results of a complete enumeration.

For the selected measures of value produced, the range of sampling errors are shown for each kind of business, size class, and legal form of organization in tables 2, 4, 6, and 8; for capital expenditures, rental payments, and fixed assets, the sampling errors are shown by kind of business and legal form of organization in tables 9, 10, 11, 12, and 13.

Data have been deleted from the tables where the sampling variability was considered excessive. Where such deletions have been made, the applicable tables have been footnoted.

Response and Other Nonsampling Errors—The measures of sampling variability do not include biases which might arise from nonsampling errors such as the failure of respondents to submit correct figures or to submit reports on time for tabulation. Information is not available as to the extent of bias that may be due to errors in reporting. However, to minimize reporting errors, all reports were reviewed for completeness and consistency of the

reported data. The various value produced ratios were calculated mechanically for each report and were compared with ratios for other firms in the same kind of business. All extreme and unusual ratios were subjected to correspondence for verification and correction. A small number of firms did not report in time for the closeout of this survey and imputed figures (based on other available records) were included for these firms. Imputation for such nonresponse amounted to less than 5 percent of the total operating receipts.

COMPARISON WITH OTHER DATA

Statistics of Income, Internal Revenue Service (IRS)—Statistics of Income issued by the Internal Revenue Service provides information on business receipts, costs of goods sold, and selected expense items and depreciable asset, compiled from the Federal income tax returns. However, the published information is not sufficiently detailed to provide income-produced measures comparable to those published in this report. Cost of goods sold—as published in *Statistics of Income*—includes some costs of labor, materials, and supplies, in addition to purchases of merchandise during the year, adjusted for changes between beginning and end-of-year inventories; cost of goods sold—as used in the Census Bureau survey—excludes salaries and wages paid to own employees, cost of packaging materials, and office and other supplies.

Business receipts and depreciable assets, as shown in the *Statistics of Income*, are comparable to total operating receipts and fixed assets figures shown in this report. However, the *Statistics of Income* data for wholesale trade includes all type of wholesalers while this report is limited to merchant wholesalers. Moreover, the IRS data are compiled on a company basis covering all establishments of the firm. Thus, retail, manufacturing, and other establishments operated by firms primarily engaged in wholesaling are included in the IRS data; on the other hand, merchant wholesale establishments operated by firms primarily engaged in manufacturing or retail trade are not represented in the IRS statistics for wholesale trade.

National Income Originating, Office of Business Economics (OBE)—OBE prepares measures of national income originating for each of the industries of the economy, including wholesale trade. National income originating for an industry represents the total factor cost incurred by that industry in producing its output. Factor costs include compensation of employees, income of unincorporated enterprises, and corporate profits, including an inventory valuation adjustment and net interest. These data are derived from a variety of sources, including the Bureau of Employment Security, Internal Revenue Service, and other government and private organizations. For the bulk of the income originating data, the industrial classification is based on the classification of establishments. However, for such items as corporate profits and net interest, the company is the basis of the industry classification.

National income originating includes an inventory valuation adjustment and an allowance for bad debts in the accounts of bankrupt debtors not reflected in net income produced (at factor cost); on the other hand, it excludes interest receipts which are included in the net income produced. These differences are relatively small. A more significant difference between these measures is due to coverage. The OBE estimate of national income originating—which amounted to \$35,280 million in 1967—covered all types of wholesalers, while the Bureau of the Census estimate of net income produced (at factor

cost)—amounting to \$23,582 million in 1967—was limited to merchant wholesalers. Merchant wholesalers accounted for 64 percent of the 1967 payroll of all wholesalers—which approximates the relationship indicated by the census estimate of net income produced (at factor cost) and the OBE estimate of national income originating.

Manufacturing and Mineral Industries—"Value added" in manufacturing published by the Bureau of the Census is computed by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments plus receipts for services rendered. This figure is further adjusted (a) to include the value added by any merchandising operation (difference between sales prices and cost value of any merchandise sold without further manufacture, processing, or assembly) and (b) to reflect the net change in finished goods and work-in-process inventories between the beginning and end of year.

The definitions of "value added" in manufacturing and in merchant wholesaling are comparable except for the treatment of excise taxes. These taxes are not included in "value added" in manufacturing. For merchant wholesalers, however, excise taxes are reflected in the gross margin, "value added," and net income produced (at market prices) measures, though not in the measure of net income produced (at factor cost).

The use of a "value added" measure—rather than an "income produced" (or originating) measure—in manufacturing was initially dictated by reporting considerations. With the growing importance of purchased services, "value added" has become increasingly less satisfactory as a substitute for "income

produced." For all manufacturing industries combined, the ratio in 1963 of national income originating (as estimated by the Office of Business Economics) to "value added" was 75 percent of "value added." For all merchant wholesale trades combined, as summarized in this report, the ratio of net income produced to "value added" is 64 percent. It should be noted that the difference in handling of excise taxes contributes to the difference between the two ratios and that the ratios for individual manufacturing industries and for individual wholesale trades often vary considerably from the average.

"Value added" in the mineral industries differs slightly from the manufactures definition. It is computed by subtracting the cost of supplies, of minerals received from other establishments for preparation, of purchased fuels and electricity, of contract work, and of purchased machinery installed, from the value of shipments and receipts and capital expenditures. It thus provides a measure, not only of the "value added" in mineral production, but also in the development of mineral properties.

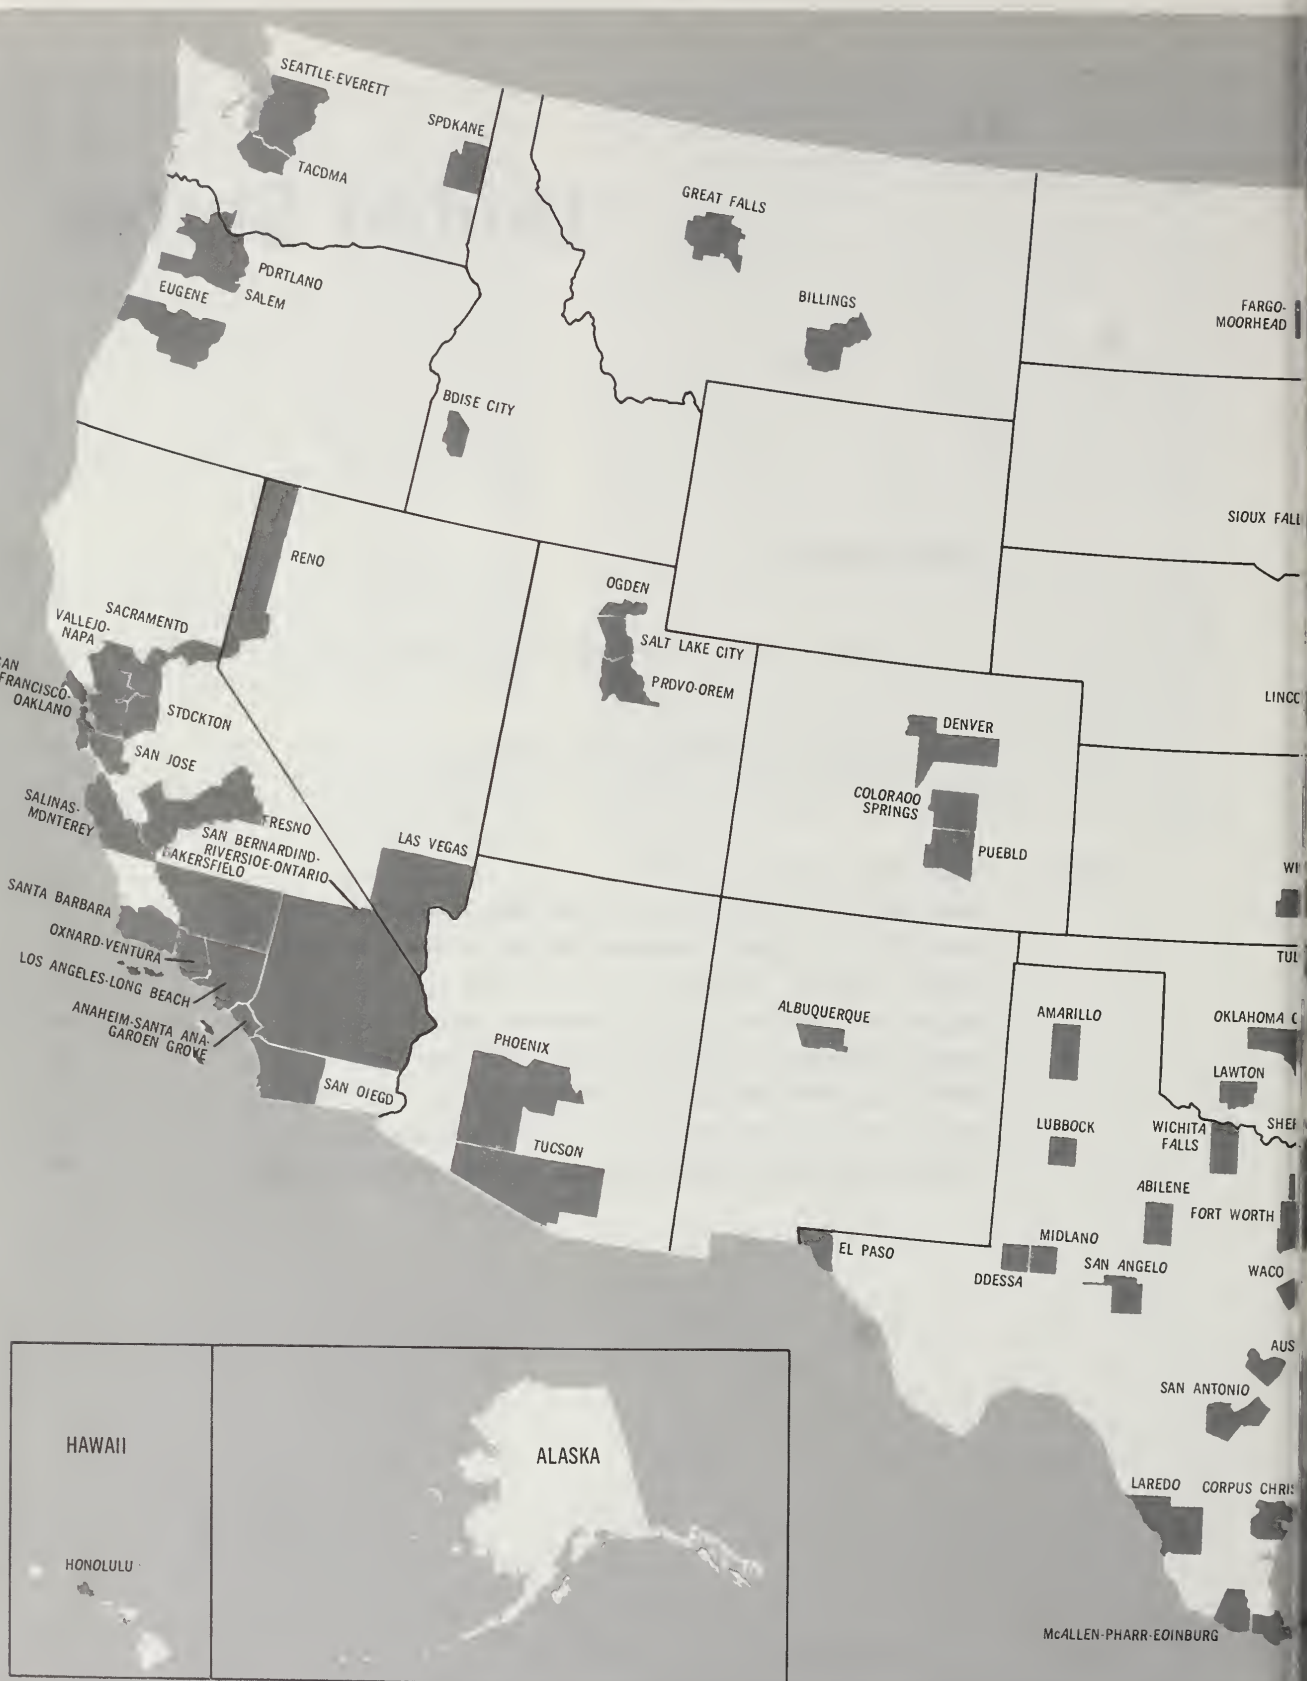

Capital Expenditures—Data on capital expenditures are compiled quarterly by the Office of Business Economics (OBE), Department of Commerce, in conjunction with the Securities Exchange Commission (SEC). Wholesale data in the OBE-SEC series are broader in scope than the Census data in this report, including both nonmerchant and merchant activities. Also, classification in the OBE-SEC series is based on the principal activity of the company as a whole, with only one report filed for all establishments of the firm, whether wholesale or not. In the Census survey, companies operating establishments in more than one type of operation were canvassed separately for their merchant wholesale establishments.
